DETAILED ACTION

Claim Objections

Claim 10 is objected to because of the following informalities:

Claim 10, page 12, line 17 should be read from "second conductors" to -- second inductors -- to be consistent with the previous claim language of claim 10.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Gobbi et al., U.S. Patent # 6,114,930.

Fig. 2 and 12 of Gobbi et al. discloses a circuit comprising: inductor L1 can be read as a first inductor; inductor L2 can be read as a second inductor (see spec. col. 4, lines 17-28, col. 5, lines 25-31); In Fig. 12, current I1 can be read as a first current; current I2 can be read as a second current.

Regarding claims 3 and 14, see spec. col. 6, lines 63-65.

Regarding claim 8, see spec. col. 8, lines 3-7.

Regarding claims 1-9, although Gobbi et al. does not have his method written out structurally, his method resides inherently in his apparatus.

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Andoh et al., U.S. Patent # 5,095,357.

Figs. 15a and 15b of Andoh et al. discloses a circuit comprising: inductor 2 can be read as a first inductor; inductor 62 can be read as a second inductor (see spec. col. 2, lines 35-43, col. 10, lines 44-63, col. 11, lines 20-30 and lines 44-46); current I1 can be read as a first current; current I2 can be read as a second current.

Regarding claims 1-9, although Andoh et al. does not have his method written out structurally, his method resides inherently in his apparatus.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 5,952,893, # 5,973,945, # 6,876,155 B2 contain some limitations of the claimed invention.
